Time-Critical

The right partner at every destination.

Perishables

Passion for your perishable products linked through a global network of like-minded professionals.

From seafood to meat and from live plants to fruits, we transport it all for you.

► KEYFOCUSPOINTS

Cold chain monitoring

Inhouse customs teams specialized in veterinary and phytosanitary procedures

Carefully selected global partners with specific industry knowledge

Compliance with international phytosanitary regulations

► SERVICES

Air Freight

When Speed Protects Quality

For high-value or highly perishable agricultural goods, speed is essential. Air freight solutions provide the fastest and most secure transport option for urgent shipments worldwide.

From fresh flowers to chilled meat, temperature controlled and time-sensitive materials, Share Logistics delivers through global connections and will deliver to your door, custom cleared and inspected for both conventional as organic being a SKAL certified partner.

► CAPABILITIES

Priority and express air freight services

Temperature-sensitive cargo handling

Coordination with certified airline partners

Real-time shipment tracking and visibility

► SERVICES

Ocean Freight

One off or long term contracts, we provide a steady shipment flow

Our local contracts and global network provide the full service scope for your container shipments. Controlled atmosphere, deep frozen, chilled, Share Logistics understands the needs for your perishable products.

With our phytosanitary and veterinary specialists inhouse, no product is out of our league. Additionally our long term relationships with all major carriers and extensive partner network sets us ahead of the market.

► CAPABILITIES

SKAL certified

CATCH document processing

Coordination with certified carriers and partners

Real-time shipment tracking and visibility

► SERVICES

Multimodal Transport for Perishable Trade

Perishable logistics depends on precision timing and flexibility. Whether transporting fresh produce, seeds, plants, greenhouse materials, or agricultural machinery, transport plays a critical role in maintaining continuity from field to distribution center and vice versa.

At Share Logistics, we ensure reliable European multimodal transport solutions tailored to seasonal peaks and sensitive cargo requirements.

► CAPABILITIES

Dedicated and groupage transport across Europe

Temperature-controlled trucks for perishable goods

Certified re-loading facilities connecting European countries

Cross-border expertise within the EU and beyond

► SERVICES

Customs expertise for Perishable Trade

At Share Logistics, we work with several in-house customs teams that take care of all your customs compliance needs for your products. Whether they involve the EU, Brexit, or global regulations.

Our fiscal representation services in various regions simplify your imports and exports and take the hassle off your hands, allowing you to focus on running your business.
